About Sangoma Technologies Corporation

Sangoma Technologies Corporation is the premium provider of PC-based hardware and software for proprietary and open source data and telephony transport solutions. The company develops and manufactures the most scalable and reliable voice and Wide Area Network data cards in the industry, including the award-winning Advanced Flexible Telecommunications (AFT) product line. Founded in 1984, Sangoma Technologies Corporation is publicly traded on the TSX Venture Exchange (TSXV: STC - News). Additional information on Sangoma can be found at: www.sangoma.com.

The TSX Venture Exchange does not accept responsibility for the adequacy or accuracy of this release.

About Paraxip Technologies

Paraxip develops and markets connectivity products that empower the rapid and cost effective deployment of IP Telephony in the contact center and in the enterprise. Paraxip's flagship software product, NetBorder, leverages standard computing platforms to provide smart connectivity to sophisticated telephony applications. The patent-pending NetBorder architecture reduces deployment costs and allows IP Telephony solutions in the enterprise to seamlessly extend their reach to numerous external devices and networks. Additional information on Paraxip can be found at: www.paraxip.com.

Sangoma is a registered trademark of Sangoma Technologies Corporation. NetBorder is a trademark of Paraxip Technologies. All other trademarks are the property of their respective owners.
